

New Beauty Shop Opened By Emma Quaggin Roberts

Mrs. Emma Quaggin Roberts has announced the opening today of a new and modern beauty shop at 1313 Sartori ave. Specializing as a hair stylist, Mrs. Roberts is well qualified to bring to her patrons the latest in personalized hair care. Among the features to be stressed in the new shop, are scientific shampoos, scalp treatments, hair shaping and conditioning. Upon completion of an extensive course of study under the direction of Alonzo Tate, president of Hollywood Hair Stylists Guild, the owner-operator of the new Torrance shop was associated with the Pandora Shop in San Pedro, operated by Tate.

Examination For Police Captain Held Here Soon

The Torrance Police Department has announced that an examination will soon be held for the position of captain, for which applications now are being filed. Only those officers with three years or more of police experience will be eligible for this grade, it was said. Two police captains, who alternate the evening and early morning shifts, are at present employed by the department, and it was not said as to whether an additional captain would be added to the force or the examination would merely determine an emergency replacement. The position will pay \$280 per month.

Cliff Bantel To Show 'How Not To Fly'

Cliff Bantel, manager for the B. and G. Air Service, Torrance Community Airport, will perform his famous aerial act "How Not to Fly in an Airplane" during the Air Circus and Exposition July 5 and 6. Bantel has been in aviation since 1929, with more than 3000 hours logged flying time in commercial flying and instructing. He was with the U. S. Army Air Forces Training Division at King City, California, as squadron commander and flight instructor, where his brother, William Bantel, was also a flight instructor. From 1929 to 1941 Bantel was engaged in the experimental manufacture of military aircraft. In addition to active participation in the air circus, Bantel will have several 1946 Luscombe airplanes on the line for inspection by the public. Bantel will also coordinate demonstrations for Boggs and McBurney Aircraft Company of Santa Monica, in their presentation of Aeronca and Stinson aircraft, which will be on view. Bantel will fly five people around the field.

LOCAL MAN INJURED
Leburn Mathews, 51, 916-B Portola ave., was treated for major injuries yesterday at the Rancho Los Amigos hospital following a collision of his auto and another at 12527 Atlantic blvd., according to information received here. Driver of the other car, Mrs. F. Strath, Lynwood, also was hospitalized for treatment of cuts and bruises.

Extra Police On Duty During Celebration

Shifts of the police force of Torrance will be altered to meet the emergency in connection with the big five-day Fourth of July "Veterans Welcome Home" jubilee, July 3 to 7, it was decided by the City Council Tuesday night. Torrance Area Projects, the organization which is handling details of the celebration for the various groups involved, including the City of Torrance, had asked for appointment of four temporary policemen to handle various phases of the celebration. Security aircraft at the Torrance airport on 101 highway was one reason for the request. It was voted to authorize Acting Chief of Police Schumacher to arrange shifts to meet the needs of the situation and to hire additional men if it felt necessary.

Large Warehouse Built To Expedite Pipe Delivery

To speed delivery of small-size pipe essential to housing and other important construction, National Tube Company, United States Steel subsidiary, has begun construction of a quarter-mile long warehouse as the latest step in a broad postwar improvement program at the company's Lorain, Ohio, pipe mills. The new building will allow efficient and systematic stocking of standard and line pipe, and will insure prompt shipments in widely varying classes and sizes from this world's largest pipe mill.

Contract for the warehouse has been awarded American Bridge Company, another U. S. Steel subsidiary, and work on this project is under way. It will house pipe racks, cranes and other new equipment necessary to stock and ship the many different kinds of steel pipe in carload lots required by the trade. Completion of the project will provide National Tube with a modern warehouse, in a central market location, where pipe in smaller diameters will be available in adequate supply for prompt delivery. Previously announced projects in the Lorain program are the installation of three additional by-product coke batteries, which will increase the coke-making capacity of the plant to 1,650,000 tons annually, and the concentration of the company's butt-weld pipe manufacture and galvanizing facilities at Lorain.

Strafing, Dog Fighting, Aerobatic Operations To Be Seen In Air Show

At amazing speeds and at grass cutting heights, Marine Corps fighter planes will demonstrate strafing, dog fighting and aerobatics as part of the huge program outlined for the Torrance "Welcome Home Veterans" air show next July 5th and 6th. In the Solomons, where it at once became the most feared plane of the allies. At Bougainville and the Jap stronghold of Rabaul, its prowess was soon shown, and the Marine pilots were downing the enemy at a ratio of ten to one. Marine pilots began operating the Corsair from both large and small carriers of the Navy with continued success. The other type plane is the Grumman "Tigercat," a twin-engine, single tail, fighter plane. The Tigercat, or F7E, as it is designated by the Navy, is the only twin-engine fighter plane in use by the Navy and Marine Corps. This plane began to come off the production lines just before the end of the war, and thus had no opportunity to be tested in actual combat. Since last year, Marine flyers have been putting the plane through all types of combat training, with gratifying results. Both types of planes will be on display in the exhibition area and maintenance men will be stationed there to answer technical questions and interested young men's queries on the opportunities available in the Marine air corps.

It has been announced that two Marine squadrons will participate, composed entirely of combat veterans whose skill was the scourge of Japanese airmen. Squadron 323 will be equipped with Corsairs and VMF 312 will be flying the new Grumman fighter, the Tigercat. The Corsair, built during the early stages of the war to put our pilots on par with the famed Japanese Zero, is distinctive with its inverted gull wing. The Corsair, known as F4U throughout the Naval Service, is very speedy and highly maneuverable. It mounts heavy fire power and can also be converted into a fighter bomber, without affecting its speed. The Corsair first saw action against the enemy early in 1943.

Rural Public Water Supply Is Discussed

By LORING MESSIER, Chief of the Section of Mountain and Rural Sanitation, Los Angeles County Health Department
The fact that a rural public water supply is provided in a safe, clean manner year in and year out, is not merely a coincidence, but is due in part to the vigilance of the Los Angeles County health department, through its mountain and rural sanitarian. All public domestic water supplies are inspected and sampled at regular intervals. The bureau of laboratories of the county health department makes bacteriological analyses of some thousands of water samples every month. Legal requirements that have been in operation for many years are the basis for these interpretations. Legal requirements standardize the method of water sample collection and analyses. Legal requirements govern the purity of water that may be used for domestic purposes. These requirements are based upon the United States public health service standards for drinking water, and are not a matter of local caprice. In rural as well as urban Los Angeles county, people are fortunate, since for the most part the owners and operators of the water systems have demonstrated a desire to maintain high standards of water purity, as well as efficiency of operation. This service and protection costs a few cents per family per year indirectly, through taxes. It is perhaps the most inexpensive form of insurance there is, and is equally available to everyone, and takes no time as far as protection is concerned. Since the beginning of this program, not one single case of waterborne disease has occurred in any public domestic water system within the area served by the Los Angeles County health department's bureau of sanitation.

Opening in Los Angeles of a new government operated "one-stop" warehouse sales center for the disposal of war surplus is slated for next Monday, June 24, at 2801 Santa Fe ave., according to announcement today by Serge F. Ballif, Jr., regional director of the War Assets Administration. Prospective buyers visiting this "machinery row" location will be able to inspect a \$4,500,000 stock of machine tools, metals and industrial materials; make selections, and arrange for purchase and shipment, Ballif announced. Beginning also next Monday, he said, is a \$10,000,000 sale of military equipment and materials at the former Torrance Alcoa plant, 190th st. and Normandie ave. The Alcoa "one-stop" center has been in continuous operation for three months. Both of these centers are to continue as day-to-day buying headquarters indefinitely, since new stocks of surplus are being received constantly from military installations and battlefronts overseas, the WAA director said. They are open 9 a. m. to 4 p. m. Mondays through Fridays. As rapidly as possible, Ballif said, this type of operation is to be extended to some 20 other locations in Southern California and northern Arizona. Price-tagged and ready for immediate sale at the Santa Fe ave. center are milling machines, arc welders, rivet hammers, rivet squeezers, automatic screw machines, Erco stretch presses, portable electric flexible shaft grinders, ferrous and non-ferrous metals, lathes, electrical equipment, chemicals and paints. Among the hard-to-get reconversion items available at the Alcoa center are milling machines, magnaflex units, beading machines, arc welders, Erco automatic punching and riveting machines, pneumatic rivet hammers, drop hammers and automatic screw machines, lathes, electrical equipment, chemicals and paints.

Los Angeles Buys Harbor School Site

Purchase of approximately 27 acres of the old Camp Ross site for a \$1,000,000 harbor area technical junior college was authorized Monday night by the board of education. The land, costing an estimated \$2250 an acre, is situated on the west side of Figueroa st., approximately 1100 feet north of Anaheim st. The board also plans to purchase an adjoining 10-acre site next year. Funds for the purchase of the 27 acres are provided in the department's current budget. The site was the board's second choice, its first having been the hilltop site opposite the Harbor Hills housing project, now a navy landing craft storage area. The Navy balked at relinquishing the site, however, unless the board could offer land in trade. Whether the board plans to use the Figueroa property in a possible swap has not been indicated.

TORRANCE JURY FREES SONNICHSEN ON DRUNK DRIVING

Alfred Sonnichsen, 37, 2212 Lomita blvd., was acquitted of drunk driving by a jury in Torrance City Court yesterday. Sonnichsen was arrested June 5 following an accident in which his car collided with an auto driven by Robert Eng, 1015 W. 256th st. A passenger of Eng, Edward Ady, was seriously injured in the mishap and confined to St. Mary's hospital in Long Beach, where he is said to have been unconscious for nearly a week. Prior to his release, Sonnichsen was free on \$1,000 bond, police said.
